Clog Dogs

Clogs by C&C SWEDEN is a family operated company, located in West Palm Beach, Florida USA and Stockholm, Sweden. Carina Wood RN, founder and designer of Clogs by C&C SWEDEN created our line of handcrafted comfort and safety clogs with the help of a third generation Swedish cobbler in 2002.

## Clogs by C&C SWEDEN

What they're saying.....

I have purchased 4 different pairs of clogs over the last 4 yrs at AORN Congress. I love these clogs, and I have extended that love to many people. They are the best! They are now 4 years old, and have been worn every day that I have worked, since I got them. Keep up the good work! Tee OR RN

I purchased three pairs last year, and they are still like brand new. I love the fit and feel of your clogs. This past spring I injured my back during a fall. These provided comfort for my feet, as well as alleviated the Pressure on my spine. I also appreciate these clogs being light weight. Thank you again for a wonderful product! Cathy, Culinary-Florida

*Being a stylist for over 12 years, I've had my share of tired, achy legs and pack pain. Since wearing my Swedish Comfort Clogs, I have no more aches and pains. They are so comfortable, and fit perfectly with the arch of my foot. It's really nice to enjoy life after work, and not need time to rest. Thanks C&C! Stephanie, Stylist FL*

## FUNQ Wear Swedish Support Socks

I started to use the socks about a year ago, since then, the improvement was Magical!!! I use them every day to work because I need to be on my feet for very long periods of time...now I decided I will wear them every day 'cause when I'm walking at the mall, or at the park, I missed them!!! The socks are so comfortable, they make me feel like some- one is lifting me and taking all the weight away from my feet :)

Dr.Claudia-Pathology

I bought 2 pairs of your support stockings, and I love them! They are much more comfortable than those sold for athletes and provide much better support because the entire foot is enclosed. The stockings sold for athletics only enclose the calf, so the swelling in my feet would be very pronounced at the end of the day. I wear them all day at work and always after completing a long (>1.5 hr) workout. Wearing them after long runs in particular seems to result in improved recovery - I have noticed less pain, stiffness, and residual fatigue the next day. They were wonderful for airplane travel as well. Thanks again! P.S.R, PhD Assistant Professor, Emergency Med Research Virginia Commonwealth University Medical Center
